Math and art activity

Goodnight Moon and Star Night Sky is such a pretty and fun kids painting activity.

Allow them to explore the night sky by first looking outside the night before they do this activity. First, paint in black an A4 paper (representing the night). Let them cut the moon (circle shape) and 7-star shapes and when the black paint its dried they can glue on it. Ask your child to count the stars and say the color of the stars, moon and night sky, as well as the shape of the moon. We are Looking forward to see pictures with our math art activity.
